

DRILL 10- BPED MOCK TEST 1

Total points 131/150 ?

Hello Future LPTs and Topnotchers!

Since this is a MOCK TEST, please complete the test without using the Internet in search of the answers. Try answering the questions honestly. God Bless!

The respondent's email (**cabiladasnicole.v@gmail.com**) was recorded on submission of this form.

BASIC INFORMATION

0 of 0 points

School (ex. Cor Jesu College, Inc.) *

QUESTIONS

131 of 150 points

✗ If a PE teacher observes a student raising both arms laterally, which plane *0/1 of motion is being used?

- ☒ A. Sagittal
- ☐ B. Frontal
- ☐ C. Transverse
- ☐ D. Oblique

✗

Correct answer

- ☒ B. Frontal

✓ During a high jump, a student bends backward to clear the bar. Which *1/1 movement is primarily occurring at the spine?

- ☐ A. Flexion
- ☒ B. Extension
- ☐ C. Rotation
- ☐ D. Lateral flexion

✓

✓ A marathon runner complains of fatigue after 30 km. Which metabolic process is predominantly used? *1/1

- ☐ A. ATP-PCr
- ☐ B. Anaerobic glycolysis
- ☒ C. Aerobic oxidation of fats and carbohydrates ✓
- ☐ D. Creatine phosphate

✓ Which principle helps reduce injury during strength training? * 1/1

- ☐ A. No supervision
- ☐ B. Maximum weight at all times
- ☐ C. Skip warm-up and cool-down
- ☒ D. Gradual progression and proper form ✓

✗ A PE teacher wants to teach the *Maglalatik* dance safely in the classroom. Which modification is most appropriate? *0/1

- ☐ A. Replace coconut shells with rubber bands
- ☒ B. Remove all percussion ✗
- ☐ C. Perform seated only
- ☐ D. Skip the rhythm entirely

Correct answer

- ☒ A. Replace coconut shells with rubber bands

✓ Which muscle group is the primary agonist during a squat? *

1/1

- ☒ A. Quadriceps
- ☐ B. Hamstrings
- ☐ C. Gastrocnemius
- ☐ D. Deltoids

✓ Which method best develops both physical and cognitive skills simultaneously?

*1/1

- ☐ A. Drill practice
- ☒ B. Game-based practice
- ☐ C. Repetition only
- ☐ D. Isolated skill practice

✓ A PE teacher uses a sit-and-reach test to measure students' flexibility. Which body area is primarily assessed?

*1/1

- ☐ A. Quadriceps
- ☒ B. Hamstrings and lower back
- ☐ C. Gastrocnemius
- ☐ D. Shoulder girdle

✓ Which type of footwear is most appropriate for minimizing lower limb injuries in running activities? *1/1

- ☒ A. Supportive, well-cushioned, and sport-specific shoes
- ☐ B. Flip-flops or sandals
- ☐ C. Barefoot always
- ☐ D. High heels

✗ A PE teacher monitors a student's heart rate during moderate jogging. Which physiological principle explains the increased cardiac output? *0/1

- ☐ A. Fick's principle
- ☒ B. Overload principle
- ☐ C. SAID principle
- ☐ D. Law of inertia

Correct answer

- ☒ A. Fick's principle

✓ Which pre-activity practice reduces the risk of musculoskeletal injuries? * 1/1

- ☒ A. Proper warm-up and stretching
- ☐ B. Heavy weightlifting without preparation
- ☐ C. Cold showers before activity
- ☐ D. Skipping warm-up

✓ Which fitness test is most suitable for evaluating upper body muscular strength? *1/1

- ☒ A. Push-up test
- ☐ B. Sit-and-reach test
- ☐ C. 50-meter dash
- ☐ D. Beep test

✓ Which Philippine festival is celebrated to honor the Santo Niño and includes street dancing with native costumes? *1/1

- ☐ A. Pahiyas
- ☐ B. Panagbenga
- ☐ C. Kadayawan
- ☒ D. Sinulog

✗ A student suffers an ankle inversion injury while playing basketball. Which ligament is most likely affected? *0/1

- ☐ A. Deltoid ligament
- ☐ B. Anterior talofibular ligament
- ☒ C. Posterior tibiofibular ligament
- ☐ D. Plantar fascia

Correct answer

- ☒ B. Anterior talofibular ligament

✓ During folk dance instruction, what is the main focus for beginners? * 1/1

- ☒ A. Rhythm, timing, and cultural context
- ☐ B. Competitive performance only
- ☐ C. Improvisation without structure
- ☐ D. Speed and power

✓ Which adaptation is appropriate for a student with hearing impairment during PE instruction? *1/1

- ☒ A. Use visual demonstrations and gestures
- ☐ B. Avoid group activities
- ☐ C. Speak louder only
- ☐ D. Use only verbal instructions

✗ A student-athlete performs better when praised individually rather than criticized publicly. Which psychological concept explains this? *0/1

- ☐ A. Social facilitation
- ☐ B. Self-efficacy
- ☒ C. Motivation
- ☐ D. Individual differences

Correct answer

- ☒ D. Individual differences

✗ A volleyball player performs a spike. Which shoulder movement is predominantly used?

*0/1

- ☒ A. Flexion
- ☐ B. Abduction
- ☐ C. Internal rotation
- ☐ D. Horizontal adduction

✗

Correct answer

- ☒ D. Horizontal adduction

✓ According to Gentile's taxonomy, a learner performing a free throw in a quiet gym is practicing which type of skill?

*1/1

- ☒ A. Closed skill with stationary object
- ☐ B. Open skill with moving object
- ☐ C. Closed skill with moving object
- ☐ D. Open skill with stationary object

✓

✓ Which of the following is the most common cause of overuse injuries in adolescents?

*1/1

- ☒ A. Repetitive movement with inadequate rest
- ☐ B. Accidental trauma
- ☐ C. Incorrect footwear only
- ☐ D. Playing outdoors

✓

✓ The inclusion of wellness education in PE reflects what modern shift? * 1/1

- ☐ A. Sports specialization
- ☐ B. Performance-based training
- ☒ C. Health-oriented curriculum
- ☐ D. Militaristic training

✓ Which cardiorespiratory adaptation is expected after 12 weeks of aerobic training? *1/1

- ☐ A. Decreased capillary density
- ☐ B. Decreased VO_2 max
- ☒ C. Increased stroke volume
- ☐ D. Decreased blood volume

✓ During PE classes, which environment factor increases the risk of heat-related illnesses? *1/1

- ☒ A. High temperature and humidity
- ☐ B. Moderate indoor temperature
- ☐ C. Shaded outdoor areas
- ☐ D. Hydration breaks

✓ A coach uses observation and feedback to correct a student's running form during practice. Which coaching method is being applied? *1/1

- ☐ A. Demonstration
- ☒ B. Direct instruction
- ☐ C. Guided discovery
- ☐ D. Modeling

✓ In volleyball, a ball touches the net on a serve but goes over into the opponent's court. Which statement is correct? *1/1

- ☐ A. The serve is a fault
- ☒ B. The serve is legal
- ☐ C. Point is replayed
- ☐ D. Serve is lost automatically

✓ Which exercise principle ensures training mimics the movements of the sport for maximum performance improvement? *1/1

- ☐ A. Reversibility
- ☒ B. Specificity
- ☐ C. Individualization
- ☐ D. Progression

✓ A PE teacher integrates technology to monitor students' heart rate during exercise. Which trend in physical education does this represent? *1/1

- ☒ A. Use of wearable fitness technology
- ☐ B. Traditional calisthenics
- ☐ C. Playground games only
- ☐ D. Competitive sports exclusively

✓ Which strategy enhances team cohesion in sports? * 1/1

- ☒ A. Regular team meetings and goal alignment
- ☐ B. Ignoring interpersonal conflicts
- ☐ C. Emphasizing only individual performance
- ☐ D. Reducing communication

✗ Which principle ensures that training intensity, duration, and frequency are appropriate for the athlete's current level? *0/1

- ☐ A. Specificity
- ☐ B. Individualization
- ☐ C. Overload
- ☒ D. Progression

Correct answer

- ☒ B. Individualization

✓ A school adopts yoga, tai chi, and mindfulness sessions to improve students' mental health. Which trend is this? *1/1

- ☒ A. Mind-body fitness integration
- ☐ B. Competitive athletics
- ☐ C. High-intensity interval training
- ☐ D. Traditional PE drills

✓ Which factor is most important when designing safe and effective training sessions? *1/1

- ☒ A. Athlete's skill level and physical condition
- ☐ B. Coach's personal preference
- ☐ C. Equipment brand
- ☐ D. Number of spectators

✗ Which mental skill is most critical for athletes needing split-second decision-making under pressure? *0/1

- ☒ A. Visualization
- ☐ B. Concentration
- ☐ C. Self-talk
- ☐ D. Relaxation

Correct answer

- ☒ B. Concentration

✓ Which principle ensures that fitness tests accurately measure the intended component? *1/1

- ☒ A. Validity
- ☐ B. Reliability
- ☐ C. Objectivity
- ☐ D. Standardization

✓ Which principle of modern PE emphasizes personalized fitness programs based on student needs? *1/1

- ☐ A. Ignoring student differences
- ☐ B. Mass drills for all
- ☐ C. Standardized workouts only
- ☒ D. Individualization and student-centered learning

✓ A volleyball player repeatedly visualizes successful serves before matches. This technique primarily enhances: *1/1

- ☐ A. Motivation
- ☒ B. Mental rehearsal
- ☐ C. Physiological adaptation
- ☐ D. Strength

✓ A PE teacher observes a student performing a skill incorrectly during a competition but correctly during practice. Which factor explains this discrepancy? *1/1

- ☒ A. Arousal and stress
- ☐ B. Fatigue
- ☐ C. Environmental temperature
- ☐ D. Motivation

✓ A student performs high-intensity interval training (HIIT). Which system experiences the greatest adaptation? *1/1

- ☐ A. ATP-PCr only
- ☐ B. Aerobic only
- ☒ C. Both anaerobic and aerobic
- ☐ D. None

✓ Which goal-setting approach is most effective for improving athletic performance? *1/1

- ☐ A. Outcome goals (winning a match)
- ☒ B. Process goals (focusing on technique)
- ☐ C. Performance goals (comparing to others)
- ☐ D. Avoidance goals (not losing)

✓ During a basketball game, a player commits an illegal screen that blocks the defender's path. Which infraction should the referee call? *1/1

- ☐ A. Charging
- ☒ B. Blocking
- ☐ C. Holding
- ☐ D. Traveling

✓ Which coping strategy is most effective for managing competition-related stress? *1/1

- ☐ A. Avoidance
- ☒ B. Relaxation techniques and cognitive restructuring
- ☐ C. Ignoring stress
- ☐ D. Overtraining

✓ During a sit-and-reach test, which muscles are being primarily assessed? * 1/1

- ☐ A. Quadriceps
- ☒ B. Hamstrings and lower back
- ☐ C. Gastrocnemius
- ☐ D. Gluteus maximus

✗ A PE teacher uses verbal instructions and demonstrations repeatedly before practice. This primarily aids which type of learning? *0/1

- ☐ A. Motor learning
- ☒ B. Perceptual learning
- ☐ C. Social learning
- ☐ D. Conceptual learning

✗

Correct answer

- ☒ A. Motor learning

✓ Which type of feedback is most effective for beginners learning a new skill? *1/1

- ☐ A. Intrinsic feedback only
- ☒ B. Extrinsic feedback with guidance
- ☐ C. Delayed feedback only
- ☐ D. Summary feedback only

✓

✓ Which energy system primarily fuels a 100-meter sprint lasting less than 15 seconds? *1/1

- ☒ A. Phosphagen (ATP-PCr) system
- ☐ B. Anaerobic glycolysis
- ☐ C. Aerobic system
- ☐ D. Lactic acid system

✓

✓ Which of the following is a common characteristic of Philippine Muslim dances? *1/1

- ☐ A. Performed in pairs only
- ☐ B. Heavy reliance on large props
- ☐ C. Fast foot-tapping only
- ☒ D. Use of fingers to express emotions

✓ Which type of feedback is most beneficial during the early stages of skill learning? *1/1

- ☐ A. Knowledge of results
- ☒ B. Knowledge of performance
- ☐ C. Intrinsic feedback only
- ☐ D. None

✓ In a volleyball match, a player contacts the ball twice consecutively on a single play. Which is the correct ruling? *1/1

- ☐ A. Legal play
- ☒ B. Fault, point for opponent
- ☐ C. Replay
- ☐ D. Allow continuation

✓ Which principle explains progressive improvements in strength and endurance? *1/1

- ☒ A. Overload principle
- ☐ B. Reversibility principle
- ☐ C. Specificity principle
- ☐ D. Individual differences principle

✓ Which type of muscle fiber is best suited for short, explosive movements? *1/1

- ☐ A. Type I (slow-twitch)
- ☐ B. Type IIa (fast-twitch oxidative)
- ☒ C. Type IIb (fast-twitch glycolytic)
- ☐ D. Type IIB (slow oxidative)

✓ A coach encourages athletes to solve problems during practice rather than giving immediate solutions. This method emphasizes: *1/1

- ☒ A. Guided discovery
- ☐ B. Direct instruction
- ☐ C. Repetition-based learning
- ☐ D. Drill practice

✓ Which safety measure is most important for team sports with contact? * 1/1

- ☐ A. Ignoring rules
- ☐ B. Playing without supervision
- ☒ C. Use of protective gear and proper technique ✓
- ☐ D. Allowing unsafe tackles

✓ Which is the strongest justification for PE in national development? * 1/1

- ☐ A. Produces Olympic medalists
- ☒ B. Reduces healthcare costs ✓
- ☐ C. Promotes celebrity athletes
- ☐ D. Encourages commercialization

✓ A coach structures practice sessions to gradually increase difficulty over weeks. This demonstrates which principle? *1/1

- ☒ A. Progression ✓
- ☐ B. Overload
- ☐ C. Specificity
- ☐ D. Reversibility

✓ If Physical Education is justified as essential because it develops the "whole person," which concept is being emphasized? *1/1

- ☐ A. Dualism
- ☒ B. Holism
- ☐ C. Mechanism
- ☐ D. Reductionism

✓ Which factor contributes most to overtraining syndrome in athletes? * 1/1

- ☒ A. Excessive volume and intensity with inadequate rest
- ☐ B. Proper periodization
- ☐ C. Balanced diet
- ☐ D. Mental relaxation techniques

✓ Which principle emphasizes providing physical education experiences tailored to students' abilities? *1/1

- ☐ A. Universal design
- ☒ B. Individualization
- ☐ C. Overload
- ☐ D. Specificity

✓ In badminton, if a shuttle hits the net during a rally and lands on the opponent's side, the correct ruling is: *1/1

- ☐ A. Fault
- ☐ B. Let
- ☒ C. Point for the server
- ☐ D. Replay

✓ A runner demonstrates excessive forward lean during sprinting. Which joint action primarily increases stride length? *1/1

- ☒ A. Hip extension
- ☐ B. Knee flexion
- ☐ C. Ankle dorsiflexion
- ☐ D. Shoulder abduction

✗ A PE teacher encourages positive self-talk in students to boost confidence. This intervention primarily targets: *0/1

- ☐ A. Motivation
- ☒ B. Self-regulation
- ☐ C. Cognitive anxiety
- ☐ D. Arousal control

Correct answer

- ☒ D. Arousal control

✓ A gymnast practices mental imagery before routines. Which psychological outcome is primarily targeted?

*1/1

- ☒ A. Anxiety reduction and motor skill enhancement
- ☐ B. Muscular hypertrophy
- ☐ C. Aerobic endurance
- ☐ D. Flexibility

✓ A student uses a wheelchair for mobility. Which PE modification is recommended?

*1/1

- ☒ A. Adapt games to include wheelchair mobility
- ☐ B. Exclude the student from running games
- ☐ C. Use only seated activities
- ☐ D. Require standing activities

✓ Which of the following is critical for a PE teacher to maintain credibility as a game official?

*1/1

- ☐ A. Knowledge of rules
- ☐ B. Physical fitness
- ☐ C. Clear communication
- ☒ D. All of the above

✓ A PE teacher ensures that the same protocol is used for all students during a test. Which principle is being applied? *1/1

- ☒ A. Standardization
- ☐ B. Validity
- ☐ C. Reliability
- ☐ D. Objectivity

✓ Which plane divides the body into superior and inferior parts, commonly used in rotational sports analysis? *1/1

- ☐ A. Frontal
- ☐ B. Sagittal
- ☒ C. Transverse
- ☐ D. Oblique

✓ A coach rotates players in different positions to develop versatility. Which coaching principle is being applied? *1/1

- ☐ A. Transfer of learning
- ☒ B. Variability of practice
- ☐ C. Overload
- ☐ D. Specificity

✓ Which physiological adaptation results from chronic endurance training? * 1/1

- ☐ A. Increased resting heart rate
- ☒ B. Increased stroke volume
- ☐ C. Decreased mitochondrial density
- ☐ D. Decreased capillary density

✓ Which of the following best reflects the principle of progressive overload *1/1 in fitness testing?

- ☒ A. Gradually increasing test intensity over time
- ☐ B. Administering tests randomly
- ☐ C. Using only baseline tests
- ☐ D. Allowing unlimited rest during testing

✓ A PE teacher designs a curriculum emphasizing lifelong fitness rather than competitive sports dominance. This approach best reflects which philosophical foundation? *1/1

- ☐ A. Idealism
- ☐ B. Realism
- ☒ C. Pragmatism
- ☐ D. Existentialism

✓ According to the inverted-U hypothesis, optimal performance occurs at: * 1/1

- ☐ A. Minimal arousal
- ☒ B. Moderate arousal
- ☐ C. Maximum arousal
- ☐ D. Zero arousal

✓ Which dance originates from the Visayas and mimics the movements of a rooster? *1/1

- ☐ A. Subli
- ☐ B. Tinikling
- ☐ C. Binislakan
- ☒ D. Kuratsa

✓ A student experiences sudden chest pain while running. What is the first safety action? *1/1

- ☒ A. Stop activity and call for medical help
- ☐ B. Encourage the student to continue
- ☐ C. Give water only
- ☐ D. Perform stretching

✓ When PE promotes values such as teamwork and sportsmanship, it primarily addresses which domain? *1/1

- ☐ A. Cognitive
- ☐ B. Psychomotor
- ☒ C. Affective
- ☐ D. Physiological

✓ A school implements interactive fitness challenges using mobile apps, step counters, and gamified workouts. Which trend is being demonstrated? *1/1

- ☒ A. Gamification and technology integration
- ☐ B. Traditional calisthenics
- ☐ C. Competition-only approach
- ☐ D. Teacher-led drills exclusively

✓ A coach observes an athlete performing a skill incorrectly and uses demonstration with correction. Which learning method is being used? *1/1

- ☐ A. Discovery learning
- ☒ B. Modeling
- ☐ C. Problem-solving
- ☐ D. Peer teaching

✓ Which principle ensures fairness and impartiality in sports officiating? * 1/1

- ☒ A. Consistency and objectivity
- ☐ B. Bias toward the home team
- ☐ C. Ignoring infractions
- ☐ D. Allowing captain's discretion

✓ Which type of feedback helps athletes develop self-awareness and self-regulation during practice? *1/1

- ☐ A. Extrinsic feedback only
- ☒ B. Intrinsic feedback
- ☐ C. Summary feedback only
- ☐ D. Delayed feedback

✓ Which technology is commonly used for virtual or remote PE classes? * 1/1

- ☒ A. Chat room
- ☐ B. Dumbbells
- ☐ C. Chalk and blackboard
- ☐ D. Powerpoint

✓ The K-12 curriculum's inclusion of fitness components is aligned with which global health recommendation? *1/1

- ☐ A. Olympic Charter
- ☒ B. WHO Physical Activity Guidelines
- ☐ C. ASEAN Education Framework
- ☐ D. UNESCO Arts Policy

✗ Which motor milestone is expected around age 2–3 years? * 0/1

- ☐ A. Walking independently
- ☐ B. Skipping and hopping
- ☒ C. Running with arm-leg coordination
- ☐ D. Catching a small ball

Correct answer

- ☒ A. Walking independently

✓ A basketball player pivots on one foot while keeping the other in place. Which joint action occurs at the supporting hip? *1/1

- ☐ A. Abduction
- ☐ B. Adduction
- ☒ C. Rotation
- ☐ D. Circumduction

✓ A PE teacher notices that a 6-year-old child struggles with catching a large ball but can throw it easily. This difficulty is due to which developmental factor? *1/1

- ☐ A. Fine motor skill deficit
- ☐ B. Gross motor skill imbalance
- ☐ C. Cognitive delay
- ☒ D. Visual-motor integration

✓ Which assessment strategy is most appropriate for students with disabilities? *1/1

- ☒ A. Flexible and criterion-referenced assessment
- ☐ B. Standardized testing only
- ☐ C. Time-based competition
- ☐ D. Excluding adaptive methods

✓ A PE teacher notices that a child consistently performs a skill incorrectly due to previously learned habits. This is called: *1/1

- ☐ A. Positive transfer
- ☒ B. Negative transfer
- ☐ C. Bilateral transfer
- ☐ D. Proactive inhibition

✓ Which bone in the lower limb bears the most weight during running? * 1/1

- ☐ A. Femur
- ☒ B. Tibia
- ☐ C. Fibula
- ☐ D. Patella

✓ Which approach in modern PE emphasizes health literacy and personal responsibility for wellness? *1/1

- ☒ A. Fitness and wellness education
- ☐ B. Drill-based competition only
- ☐ C. Focus on winning games
- ☐ D. Ignoring health topics

✓ A runner sets a goal to beat their personal best time in the next race. This *1/1 is an example of:

- ☐ A. Process goal
- ☒ B. Outcome goal
- ☐ C. Avoidance goal
- ☐ D. Extrinsic goal

✓ If a PE program prioritizes measurable performance outputs only, what principle is neglected? *1/1

- ☒ A. Inclusivity
- ☐ B. Efficiency
- ☐ C. Specificity
- ☐ D. Overload

✓ Which approach emphasizes lifelong physical activity and wellness rather than competitive sports only? *1/1

- ☒ A. Holistic physical education
- ☐ B. Drill-based instruction
- ☐ C. Competition-focused PE
- ☐ D. Weightlifting only

✓ A basketball player misses free throws during finals but performs well in practice. Which psychological factor is most likely affecting performance? *1/1

- ☐ A. Motivation
- ☒ B. Anxiety
- ☐ C. Self-efficacy
- ☐ D. Concentration

✓ Which coaching behavior enhances long-term motivation and reduces burnout? *1/1

- ☒ A. Positive reinforcement and constructive feedback
- ☐ B. Excessive criticism and pressure
- ☐ C. Ignoring effort
- ☐ D. Emphasizing only winning

✓ A PE teacher emphasizes safety while performing *Itik-itik*. Which precaution is most suitable? *1/1

- ☒ A. Ensure adequate space and avoid slippery floors
- ☐ B. Use elevated platforms
- ☐ C. Perform in small rooms only
- ☐ D. Skip footwork

✓ During prolonged exercise, which macronutrient is the main energy source? *1/1

- ☐ A. Protein
- ☒ B. Carbohydrates
- ☐ C. Fats
- ☐ D. Vitamins

✓ The shift from militaristic drills during the American period to recreational *1/1 physical activities in the Philippines reflects which educational movement?

- ☐ A. Humanism
- ☒ B. Progressivism
- ☐ C. Perennialism
- ☐ D. Essentialism

✓ Which type of motivation is driven by internal satisfaction rather than *1/1 external rewards?

- ☒ A. Intrinsic motivation
- ☐ B. Extrinsic motivation
- ☐ C. Achievement motivation
- ☐ D. Task-oriented motivation

✗ Which type of periodization alternates high and low intensity across *.../1 training cycles?

- ☐ A. Linear
- ☒ B. Undulating
- ☐ C. Block
- ☐ D. Continuous

No correct answers

✓ Which stage of motor learning is characterized by inconsistent performance and frequent errors? *1/1

- ☒ A. Cognitive stage
- ☐ B. Associative stage
- ☐ C. Autonomous stage
- ☐ D. Retention stage

✓ Which teaching method helps students retain cultural significance while performing folk dances? *1/1

- ☒ A. Demonstration with explanation of history and symbolism
- ☐ B. Focus on speed and competition only
- ☐ C. Ignore traditional costumes
- ☐ D. Skip music and rhythm

✓ A student trains at 60% of maximum heart rate for 45 minutes. Which component of fitness is primarily targeted? *1/1

- ☐ A. Muscular strength
- ☐ B. Flexibility
- ☒ C. Aerobic endurance
- ☐ D. Agility

✗ Which type of practice is most effective for skill acquisition in complex motor tasks? *0/1

- ☐ A. Massed practice
- ☒ B. Distributed practice
- ☐ C. Random practice
- ☐ D. Blocked practice

✗

Correct answer

- ☒ C. Random practice

✓ A coach designs a training program emphasizing sport-specific movements. This primarily applies which principle? *1/1

- ☐ A. Reversibility
- ☒ B. Specificity
- ☐ C. Overload
- ☐ D. Individualization

✓

✓ A PE teacher notes that a student has scapular winging. Which muscle is most likely weak? *1/1

- ☐ A. Trapezius
- ☒ B. Serratus anterior
- ☐ C. Latissimus dorsi
- ☐ D. Rhomboids

✓

✓ Which hormone primarily regulates glucose mobilization during prolonged exercise?

*1/1

- ☐ A. Insulin
- ☒ B. Glucagon
- ☐ C. Cortisol
- ☐ D. Aldosterone

✓ Which type of instruction is most effective for students with multiple disabilities?

*1/1

- ☒ A. Multi-sensory approach
- ☐ B. Verbal instructions only
- ☐ C. Competitive games only
- ☐ D. Standardized drills only

✗ Which coaching style is most effective for highly skilled athletes seeking autonomy? *0/1

- ☐ A. Authoritative
- ☐ B. Democratic
- ☒ C. Laissez-faire
- ☐ D. Command

Correct answer

- ☒ B. Democratic

✓ Which is the primary oxygen-carrying molecule in blood? *

1/1

- ☐ A. Myoglobin
- ☒ B. Hemoglobin
- ☐ C. Albumin
- ☐ D. Fibrinogen

✓ Which of the following is a closed kinetic chain exercise? *

1/1

- ☐ A. Leg extension machine
- ☒ B. Squat
- ☐ C. Biceps curl
- ☐ D. Bench press

✓ A PE teacher promotes eco-friendly outdoor activities, like hiking and nature-based games. Which trend does this reflect?

*1/1

- ☒ A. Environmental and outdoor education in PE
- ☐ B. Indoor gym-based workouts only
- ☐ C. Competitive sports exclusively
- ☐ D. Weightlifting only

✓ During skill retention tests, a student performs better after a period of rest. Which concept explains this phenomenon? *1/1

- ☐ A. Transfer of learning
- ☒ B. Retention
- ☐ C. Generalization
- ☐ D. Repetition

✓ A PE teacher wants to compare students' aerobic fitness against national standards. Which term describes this approach? *1/1

- ☒ A. Criterion-referenced testing
- ☐ B. Norm-referenced testing
- ☐ C. Formative assessment
- ☐ D. Summative assessment

✓ A PE teacher modifies a relay race for students with mobility limitations. Which principle is being applied? *1/1

- ☒ A. Adaptation for inclusion
- ☐ B. Progressive overload
- ☐ C. Specificity
- ☐ D. Reversibility

✓ A school eliminates PE to give more time for Math and Science. From a philosophical standpoint, this decision contradicts which concept? *1/1

- ☐ A. Education for specialization
- ☐ B. Education for utility
- ☒ C. Education for total development
- ☐ D. Education for efficiency

✓ Which of the following is a responsibility of a PE teacher acting as a referee? *1/1

- ☐ A. Enforcing rules
- ☐ B. Ensuring player safety
- ☐ C. Maintaining impartiality
- ☒ D. All of the above

✗ A 10-year-old child exhibits rapid improvement in coordination but poor balance in new activities. This reflects which developmental principle? *0/1

- ☒ A. Cephalocaudal
- ☐ B. Proximodistal
- ☐ C. Individual differences
- ☐ D. Maturation

Correct answer

- ☒ D. Maturation

✓ A PE teacher explains offside rules in soccer. Which best describes offside? *1/1

- ☒ A. Being nearer to the opponent's goal than both the ball and second-last defender when receiving a pass ✓
- ☐ B. Handling the ball intentionally
- ☐ C. Entering the field without permission
- ☐ D. Kicking the ball out of bounds intentionally

✓ Which historical influence introduced structured physical drills in Philippine schools? *1/1

- ☐ A. Spanish regime
- ☒ B. American regime ✓
- ☐ C. Japanese regime
- ☐ D. Pre-colonial era

✓ A coach emphasizes teamwork, discipline, and respect alongside technical skills. This reflects which coaching focus? *1/1

- ☒ A. Holistic coaching ✓
- ☐ B. Task-oriented coaching
- ☐ C. Outcome-oriented coaching
- ☐ D. Technical coaching only

✓ Which type of joint allows the greatest range of motion in the human body? *1/1

- ☐ A. Hinge
- ☒ B. Ball-and-socket
- ☐ C. Pivot
- ☐ D. Saddle

✓ A student sprains their ankle during PE. Which is the recommended first aid approach? *1/1

- ☒ A. Rest, Ice, Compression, Elevation (RICE)
- ☐ B. Immediate massage only
- ☐ C. Heat application immediately
- ☐ D. Continue activity

✓ During a track and field race, an athlete steps inside the lane line and gains advantage. What is the proper ruling? *1/1

- ☐ A. Warning
- ☒ B. Disqualification
- ☐ C. Time penalty
- ☐ D. Allow continuation

✓ A student with visual impairment is learning to play goalball. Which modification enhances learning? *1/1

- ☒ A. Use a ball with a bell inside
- ☐ B. Remove all sound cues
- ☐ C. Require outdoor play only
- ☐ D. Increase visual stimuli

✓ A PE teacher implements hydration breaks, shaded areas, and pacing during outdoor activities. Which safety principle is being applied? *1/1

- ☒ A. Environmental adaptation and risk management
- ☐ B. Overload principle
- ☐ C. Specificity principle
- ☐ D. None of the above

✓ During the performance of the *Tinikling*, which motor skill is primarily required? *1/1

- ☒ A. Agility and coordination
- ☐ B. Strength and power
- ☐ C. Flexibility only
- ☐ D. Endurance only

✗ Which disability primarily requires modifications to enhance motor coordination and fine motor skills?

*0/1

- ☐ A. Intellectual disability
- ☒ B. Physical disability
- ☐ C. Visual impairment
- ☐ D. Hearing impairment

✗

Correct answer

- ☒ A. Intellectual disability

✓ Which current trend focuses on inclusive PE for students of all abilities? * 1/1

- ☐ A. Traditional drill instruction
- ☐ B. Elite sports training only
- ☐ C. Gender-exclusive programs
- ☒ D. Adapted and inclusive physical education

✓

✗ A student experiences delayed onset muscle soreness (DOMS) after unaccustomed exercise. Which type of contraction caused it? *0/1

- ☒ A. Concentric
- ☐ B. Eccentric
- ☐ C. Isometric
- ☐ D. Isokinetic

✗

Correct answer

- ☒ B. Eccentric

✓ Which factor most influences the rate of motor development in children? * 1/1

- ☐ A. Practice only
- ☒ B. Genetics and environment
- ☐ C. Teacher motivation
- ☐ D. Equipment quality

✓

✓ A PE teacher officiating a soccer game notices a player deliberately handles the ball to prevent a goal. Which action should be taken? *1/1

- ☐ A. Free kick for the defending team
- ☐ B. Goal awarded
- ☒ C. Penalty kick for the opposing team
- ☐ D. Throw-in

✓

✓ A PE teacher wants consistent results across multiple trials of a fitness test. Which principle is being emphasized? *1/1

- ☐ A. Validity
- ☒ B. Reliability
- ☐ C. Objectivity
- ☐ D. Feasibility

✓ A coach encourages self-assessment, reflection, and goal-setting in athletes. This approach emphasizes: *1/1

- ☒ A. Athlete-centered coaching
- ☐ B. Drill-based coaching
- ☐ C. Command-style coaching
- ☐ D. Laissez-faire coaching

✓ Which test is most appropriate for assessing lower body explosive power? *1/1

- ☐ A. 1-mile run
- ☒ B. Vertical jump
- ☐ C. Sit-and-reach
- ☐ D. Push-up

✓ Which principle best supports including PE as a core subject in basic education? *1/1

- ☒ A. Physical fitness improves academic performance
- ☐ B. Sports increase school revenue
- ☐ C. PE reduces classroom discipline issues
- ☐ D. PE prepares athletes for national competitions

✓ Which principle states that children develop gross motor skills before fine motor skills? *1/1

- ☐ A. Cephalocaudal
- ☒ B. Proximodistal
- ☐ C. Individual differences
- ☐ D. Maturation

✓ A PE teacher observes that a student's heart rate returns to baseline quickly after exercise. Which fitness component is being assessed? *1/1

- ☐ A. Muscular endurance
- ☐ B. Flexibility
- ☒ C. Cardiovascular efficiency
- ☐ D. Agility

✓ A PE teacher wants to modify a skill for a child with developmental delay. *1/1
Which approach is most appropriate?

- ☒ A. Reduce task complexity
- ☐ B. Increase task difficulty
- ☐ C. Remove visual cues
- ☐ D. Eliminate repetition

✓ A student with cerebral palsy struggles with balance during locomotor activities. Which adaptation is most appropriate? *1/1

- ☒ A. Reduce the activity space and provide support
- ☐ B. Eliminate movement activities
- ☐ C. Increase activity intensity
- ☐ D. Use competitive games only

✓ During a push-up, which muscle is the primary stabilizer of the shoulder girdle? *1/1

- ☐ A. Pectoralis major
- ☐ B. Triceps brachii
- ☒ C. Serratus anterior
- ☐ D. Deltoid

✓ Which festival is celebrated in Baguio City and showcases flowers through street dancing? *1/1

- ☒ A. Panagbenga
- ☐ B. Sinulog
- ☐ C. Kadayawan
- ☐ D. Ati-Atihan

✓ Which best defines Physical Education as a discipline? * 1/1

- ☐ A. Training for athletes
- ☒ B. Study of human movement
- ☐ C. Military preparation
- ☐ D. Sports entertainment

✓ Which test is most appropriate for assessing cardiovascular endurance in *1/1 high school students?

- ☐ A. 1RM bench press
- ☒ B. 20-meter shuttle run (Beep Test)
- ☐ C. Sit-and-reach test
- ☐ D. Vertical jump test

✓ During exercise in hot environments, which physiological response prevents heat stroke? *1/1

- ☐ A. Vasoconstriction
- ☒ B. Sweating and vasodilation
- ☐ C. Increased blood pressure
- ☐ D. Increased glycogen storage

✓ A soccer team captain uses encouragement and verbal cues to maintain team cohesion. Which psychological principle is applied? *1/1

- ☒ A. Leadership
- ☐ B. Self-confidence
- ☐ C. Goal setting
- ☐ D. Stress management

✓ A PE teacher administers a fitness battery and records each student's score. Which data type is primarily used? *1/1

- ☐ A. Nominal
- ☐ B. Ordinal
- ☒ C. Interval/ratio
- ☐ D. Categorical

✗ Which dance step in *Cariñosa* emphasizes handkerchief manipulation? * 0/1

- ☒ A. Balik-balik
- ☐ B. Cross-step
- ☐ C. Fan step
- ☐ D. Point-step

Correct answer

- ☒ B. Cross-step

✓ A teacher incorporates circuit training with strength, cardio, and flexibility *1/1 stations. Which contemporary approach is being applied?

- ☒ A. Functional fitness and cross-training
- ☐ B. Traditional single-skill drills
- ☐ C. Competitive game play only
- ☐ D. No structured plan

✓ Which lever system is most commonly used in biceps curl exercises? * 1/1

- ☐ A. First-class
- ☐ B. Second-class
- ☒ C. Third-class
- ☐ D. None of the above

✓ A PE teacher notices students performing exercises with poor form. Which preventive measure is most appropriate? *1/1

- ☒ A. Provide proper instruction and supervision
- ☐ B. Ignore minor errors
- ☐ C. Encourage maximum load regardless of form
- ☐ D. Remove the exercise entirely

✓ Which is a key goal of adapted physical education? * 1/1

- ☒ A. Promote lifelong physical activity and inclusion
- ☐ B. Focus solely on competition
- ☐ C. Limit participation to certain students
- ☐ D. Emphasize fitness testing only

✓ A sprinter's rapid arm swing during a race involves which type of muscle contraction? *1/1

- ☐ A. Isometric
- ☒ B. Concentric
- ☐ C. Eccentric
- ☐ D. Static

✗ During cycling, which joint action occurs at the knee when the pedal is pushed downward? *0/1

- ☒ A. Flexion
- ☐ B. Extension
- ☐ C. Circumduction
- ☐ D. Lateral rotation

Correct answer

- ☒ B. Extension

✓ A child practices dribbling while moving unpredictably past obstacles. This is an example of: *1/1

- ☐ A. Closed skill practice
- ☒ B. Open skill practice
- ☐ C. Isolated skill practice
- ☐ D. Stabilized skill practice
