

ENVIRONMENTAL PRINCIPLE	CONCRETE EXAMPLE/S
1. Nature Knows Best	The utilization of the Ifugao's of the natural slopes and nature's design when making the irrigation system Rice terraces.
2. All forms of life are important	There are several laws in the Philippines protecting wildlife like eagles, tarsiers, and sea turtles like the Wildlife Resources Conservation and Protection Act.
3. Everything is connected to everything else	The rampant use of using chemical fertilizers from farmlands can cause harm to fisheries when runoffs from the farmlands pollutes coastal waters and rivers.
4. Everything changes	The rising of the sea levels caused by climate change.
5. Everything must go somewhere	Improper waste disposal to rivers causes pollution in waters, and even causes flood in several areas in the country.
6. Ours is a finite Earth	Excessive deforestation for timbers causes forest cover depletion.
7. Nature is beautiful and wonderful, and we are stewards of God's creation	Tree planting programs from schools and communities helps regain nature's resources.
